**OUR TRADE GROWS.**

REASON FOR NATION'S DEVELOPMENT SEEN IN FIGURES.

Since 1880 Commerce of the United States Has Almost Doubled in Volume—Minerals a Big Factor.

Washington.—The underlying cause of the wonderful development of the United States during the last 25 years through which it has reached first place in manufacturing in the family of nations are suggested by a compilation recently prepared by the department of commerce and labor through its bureau of statistics, showing the production of the principal minerals at intervals from 1880 down to date in the United States and in the world as a whole.

The commerce of the United States has increased from \$1,500,000,000 in 1880 to \$2,500,000,000 in 1904, while the commerce of the world meantime has increased from \$12,000,000,000 to \$22,000,000,000, the relative increase made by the United States being thus greater than that of the other parts of the world.

The principal mineral products entering into and forming the basis of industry and commerce are coal, pig iron, copper, lead, zinc, petroleum and the precious metals, and in the production of each of these the United States has shown a wonderful development during the 25 years under review. The world's production of coal has grown from 30,000,000 tons in 1880 to 80,000,000 in 1904, the growth being 56,000,000, or 170 per cent; of iron, from 1,000,000 tons in 1880 to 18,000,000 in 1904, an increase of 17,000,000, or 1,700 per cent; of copper from 150,000 tons to 510,000, an increase of 360,000, or 240 per cent; of lead from 25,000 tons to 87,000, an increase of 62,000, or 248 per cent; and of zinc from 223,000 tons to 565,000, an increase of 342,000, or 153 per cent. Statistics showing the world's production of petroleum are available only for the years 1890 to 1903. In the first year named the world's production of petroleum aggregated 148,000,000 barrels of 42 gallons each, while in 1903 its production was 198,000,000 barrels.

In each of these materials it will be observed that there has been a considerable growth. When, however, the figures are stated, the increase being 654,000, or 280 per cent; and the production of zinc increased from 223,000 tons to 565,000, an increase of 342,000, or 153 per cent. The United States produces 37 per cent of the world's coal, 39 per cent of its pig iron, 81 per cent of its copper, 25 per cent of its zinc, and 51 per cent of its petroleum. In the production of coal, pig iron, copper and petroleum the United States leads the world.

**Given Up To Die**

B. Spiegel, 1204 N. Virginia St., Evansville, Ind., writes: "For over five years I was troubled with kidney and bladder affections which caused me much pain and worry. I lost flesh and was all run down, and a year ago had to abandon work entirely. I had three of the best physicians who did me no good and I was practically given up to die. Foley's Kidney Cure was recommended and the first bottle gave me great relief, and after taking the second bottle I was entirely cured." Sold by R. C. Stockton.

**Cured of Bright's Disease.**

Geo. A. Sherman, Lisbon, Ind. Mills, Lawrence Co., N. Y., writes: "I had kidney disease for many years and had been treated by physicians for twelve years; had taken a well known kidney medicine and other remedies that were recommended, but got no relief until I began using Foley's Kidney Cure. The first half bottle relieved me and four bottles have cured me of this terrible disease. Before I began taking Foley's Kidney Cure I had to make water about every fifteen minutes, day and night, and passed a brick-dust substance, and sometimes a slimy substance. I believe I would have died if I had not taken Foley's Kidney Cure." Sold by R. C. Stockton.

**Elephant Fights with Bear.**

A new form of injury was treated in New York the other night. A youth had attempted to ride the backing elephant at the new hippodrome, and the beast, enraged because he could not shake him off, flapped at and struck him with his ears. An elephant's ear is said to be "some hard." At all events, the boy had a cut head and one of his ears was all but off as proof of what the elephant could accomplish with her ears.

**SCOTT'S EMULSION**

and it cures the cold. That's what is necessary. It soothes the throat because it reduces the irritation; cures the cold because it drives out the inflammation; builds up the weakened tissues because it nourishes them back to their natural strength. That's now Scott's Emulsion deals with a sore throat, a cough, a cold, or bronchitis.

**NEWEST FAD IN COLLECTING**

London Small Boys Rob Shop Windows of Lettering in Keeping in the Swim.

London.—The craze for collecting the bands placed around cigars was imported from San Francisco, where the fad reigned for years before it was brought east.

It is to be hoped that the small boys do not turn to England for their new fad, which is the collection of enamel letters used on shop windows and bits of mosaic from house vestibules.

The craze has become the craze that the London police have been given strict orders to be particularly alert in the detection of these acts of pilfering; and the small boy, not to be outdone, has formed his companions into robber gangs, with scouts posted on the corners to warn the active marauders of the approach of the "bobbies."

In several instances shop windows have been cleaned of lettering in a single night, not always by a single gang, and now that boy who has succeeded in removing the letters from a sign fastened inside of the window is regarded doubly a hero by his fellows.

Damage to signs to the extent of several hundred dollars a week has been recorded, and unless the craze abates it will seriously injure those whose business is the manufacture and adjusting of these signs.

In several instances the boys have climbed to second-story windows to remove the lettering that ordinarily might be supposed to be safely out of reach.

**GIRLS RESCUE AN ESCORT.**

Tris Upset in Canoe, Sisters Swimming, Supporting Man—Land Him Safe Ashore.

Stamford, Conn.—It was fortunate that Miss Clara Wolke and her sister Freda learned how to swim when they lived in New York. Their experience as swimmers enabled them to save themselves and Howard Hottel from drowning in the Rippowam river there.

The Misses Wolke are pretty and venturesome. They boarded a little canoe with Holly and went for a sail on the river. The three were stung by the chorus of Edna May's canoe song when they were hailed by Holly's brother. The latter tried to jibe the canoe.

Already overweighed, with little free board showing, the little craft careened as the sail swung over, filled and sank rapidly.

The river is deep at this point and a strong current sweeps toward the sound. The girls were retarded by heavy winter coats and stout walking shoes. Holly could not swim, and the girls had no notion of deserting him.

Each took a position on either side of him and, supporting him between them, swam to the river bank. So exhausted were they that they could not drag themselves out of the water for several minutes. They made little of their plucky action.

"The water wasn't a bit cold," said Miss Clara Wolke. "We are fond of swimming and did not mind this early bath at all. Mr. Holly helped us all the while. If thought more of the danger we were in than he did of himself."

**Cats Made Beneficiaries.**

Mr. G. H. Halch, a gentleman residing at Bath, England, by his will left Martha Brown a legacy of £50 per annum to look after all his cats as long as they should live. In the chancey disposition, Mr. Justice Joyce was asked to determine whether this was a trust for the lives of the cats, who were all in number, and whose ages were said to range from four years upward, or whether it was an absolute trust to be paid to the cats, who were all in number, with a condition that she should look after them. His lordship held that the annuity would cease with the death of the last cat.

**Boomer Snores Too Loudly.**

"Squire, I have a roomer who snores too loud. Can't I legally eject him from the premises on those grounds?" inquired Mrs. M. G. Gibson, of Cincinnati, O., of Squire Dunmont. She said that H. Martin, who rooms at her house, possesses a snore of such penetrating power that she and her neighbors have lost much sleep. Squire Dunmont issued a writ of forcible entry and detainer against Martin.

**Steer in Drygoods Store**

Makes Sad Onslaught on Left-Over Easter Bonnets—Stockings Hang to Horns.

Camden, N. J.—It wasn't exactly a bear in a china shop, but it was a steer in a dry goods store which created a lot of excitement in South Camden. A big herd of steers from Philadelphia left a Kain's Point ferry boat, and was being driven out Kaighn avenue when a Third street trolley car suddenly flashed on the bunch, which immediately stampeded in all directions. There were many pedestrians on the avenue at the time and they vied with the steers in the general stampede.

The biggest steer of the lot took to the sidewalk and saw himself reflected in the heavy plate glass window of Philip Overbach's dry goods store, at No. 30 Kaighn avenue. He barked to the curb, then made a dash for the window, which was broken into a thousand pieces. The steer landed in the store and mixed up with millinery goods, left-over Easter hats, ribbons, lingerie, etc.

The animal hauled out of the store with a pair of openwork stockings on one horn, a pair of socks on the other, and becketed with many ribbons to make him look like a prize ox. The big fellow had no sooner reached the sidewalk than he butted his head into an adjoining window and that, too, was shattered.
